

IT'S NOT JUST ABOUT YOUR WATER. IT'S ABOUT YOUR *home.*

Once you experience chlorine free water, you'll always appreciate it.

Chlorine free water makes your life better. Your water will taste and smell better. Even your skin will notice the difference. Our Proficient H₂O Pro300 Carbon Filtration System will provide water that is chlorine free.

Make life more enjoyable

- Reduces tastes, odors and dissolved organic chemicals from water supplies
- No unpleasant chlorine taste and odor to deal with
- Better for your skin and hair

WORKS *here.*

AND *here.*

AND *here.*

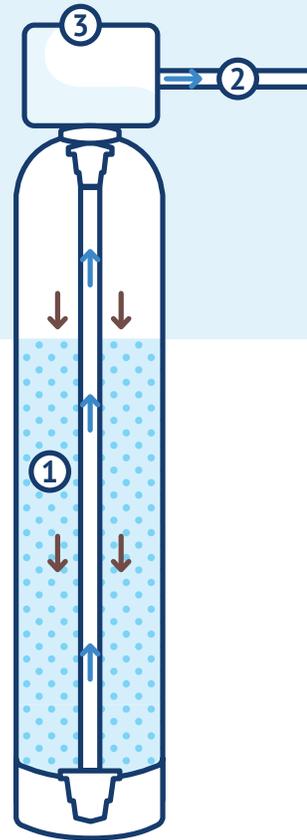

With our Pro300 Carbon Filtration System, your water passes through an activated carbon bed (1) which is ideal for chlorine taste and odor reduction. Activated carbon requires periodic backwashing of the filter bed. Activated carbon bed typically requires replacement every 24 months or when chlorine breakthrough occurs.

The Pro300 Control (3) Features:

- Scrolling user screen displays time of day days to next regeneration and current flow rate.
- User-friendly electronics with permanent memory backup of all programmed settings ensure nothing is lost during power outages.
- Several programming options.
- Backup battery maintains the clock even during power outages.

Systems available in three sizes to fit the water use demands of most homes. Filters can be used alone or in multi-tank configurations for higher flow rate applications.

If your water needs more than softening, you can also count on us for:

- Water Softening Systems
- Drinking Water Systems
- Iron Reduction Systems
- Problem Water Solutions, such as pH balancing

Nearly 50 years of water treatment experience built into every Proficient H₂O product

- Available only to highly trained independent plumbers and wholesalers
- Complete line of treatment options
- Proven to solve the toughest challenges facing well and city water

Specifications

Model ¹	Pipe Size	CF Filter Media	Tank Size	Service Flow Rates ¹ (gpm)		Backwash Flow Rate (gpm)	Est. Ship Wt. Lbs.
				Continuous ²	Peak ³		
PRO300-CSC-10-1.5	1"	1.5	10x54	3.8	7.5	5.3	91
PRO300-CSC-12-2	1"	2	12x52	5.0	10.0	7.5	121

1. Service Flow Rates for clean water, chlorine reduction only. For other applications, flow ratings may need to be reduced.

2. Continuous Flow - Steady flow of water is being processed through filter system for extended period of time.

3. Peak Flow - Temporary, short duration interrupted patterns of water is being process through filter system.
