

**ProficientH<sub>2</sub>O**<sup>®</sup>

**IRONLAZER**<sup>®</sup>  
Iron Reduction System

**IT'S NOT JUST ABOUT YOUR WATER. IT'S ABOUT YOUR *home.***

**Once you experience iron free, odor free water you'll always appreciate it.**

Iron and odor free water makes life better. The Iron Lazer<sup>®</sup> Filtration System is among the simplest, economical operating and effective iron filters available. It reduces iron, sulfur and manganese from water without using harmful and expensive chemicals.

**Make life more enjoyable**

- Water tastes and smells better
- Clothing will be brighter, whiter and last longer
- No more rust stains throughout your home

**Save money and time**

- Save time and money cleaning rust stains in bathroom, kitchen & laundry
- Water using appliances and fixtures last longer
- Decreases salt consumption for your water softener
- Extends the life of your water softener and drinking water systems

**WORKS *here.***

**AND *here.***

**AND *here.***

## The Iron Lazer requires no salt or chemicals for operation or regeneration

With the Iron Lazer system, your water passes through an oxygen rich air pocket (1) which converts dissolved minerals such as iron, manganese and sulfur into physical particles. These particles then pass through our filter bed (2) which filters out these particles leaving clean, good smelling, and good tasting water (3).

## The Pro300 Iron Lazer system is designed to handle tough iron applications

### Pro300 Control (4) Features:

- Scrolling user screen displays time of day, days to next regeneration & current flow rate
- User-friendly electronics with permanent memory backup of all programmed settings ensure nothing is lost during power outages
- Several programming options
- Battery backup maintains the clock even during power outages

The Iron Lazer system is available in two sizes to fit the water use demands of most homes. The Iron Lazer can be used alone or in multi-tank configurations for higher flow rate applications

## If your water needs more than iron reduction, you can also count on us for:

- Drinking Water Systems
- Water Softening Systems
- Problem Water Solutions, such as pH balancing and taste and odor issues

## Over 50 years of water treatment experience built into every Proficient H<sub>2</sub>O product

- Available only to highly trained independent plumbers and wholesalers
- Complete line of treatment options
- Proven to solve the toughest challenges facing well and city water

## Specifications

Model Number	Max. Service Flow Rate <sup>1</sup> (GPM)	Backwash Flow Rate <sup>2</sup> (GPM)	Max. Influent Contaminant Levels <sup>3</sup>		
			Iron (mg/L)	Manganese (mg/L)	Hydrogen Sulfide (mg/L)
PRO300 ILS-10 Iron Lazer	4	5.3	3	1	1
PRO300 ILS-12 Iron Lazer	6	7.5	3	1	1

1. Maximum service flow rates are for intermittent household use only. Consult factory for applications requiring higher service flow rates.

2. Minimum of 30 psi required at backwash flow rates listed. Water temperatures above 60°F will require higher backwash rates.

3. Always have your water tested before you purchase any water treatment system. See owner's manual for specific operating conditions and limitations.
